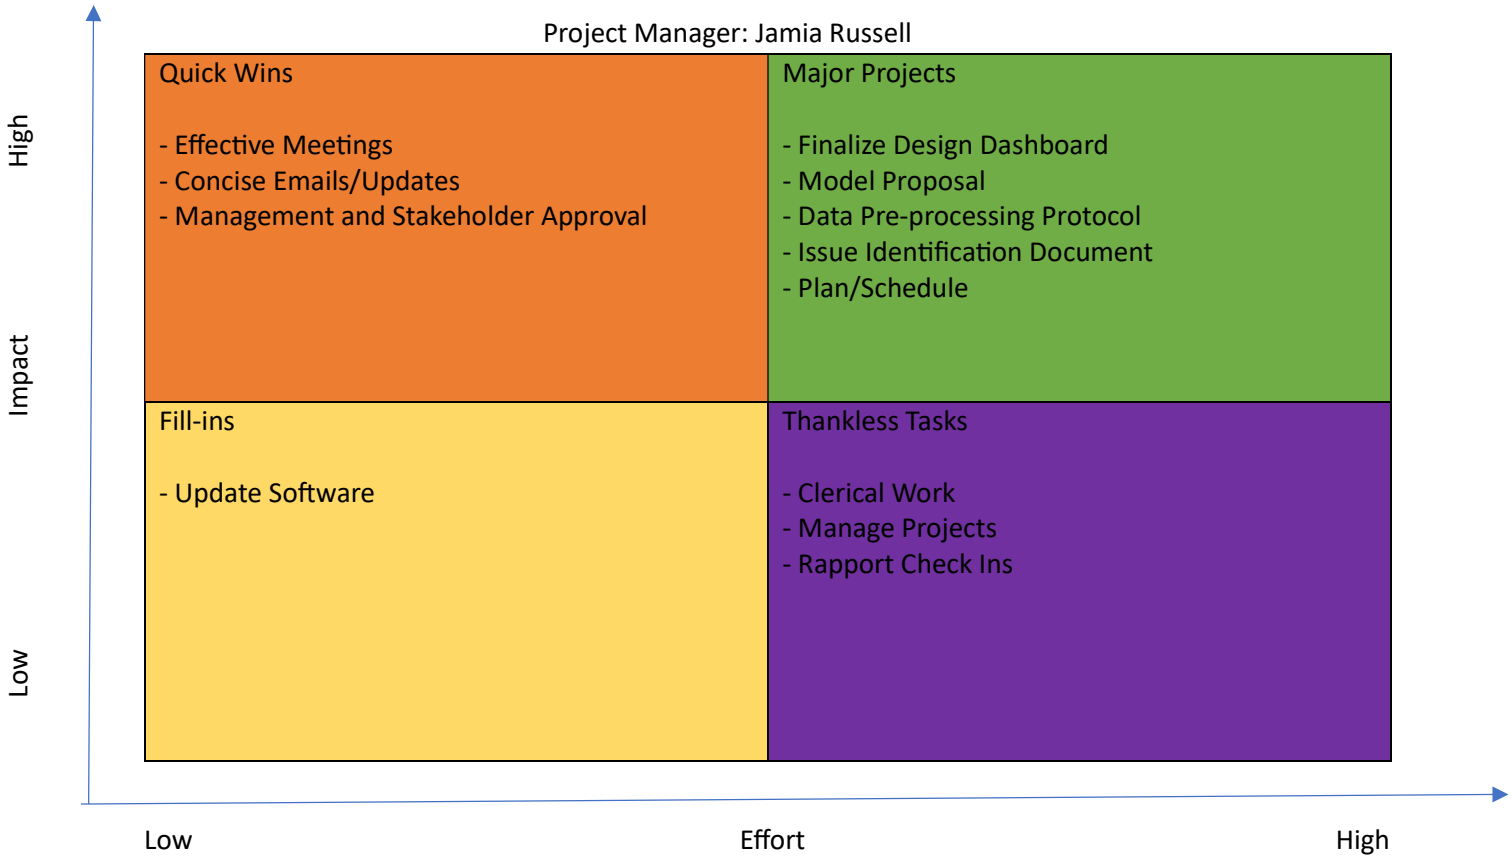
FPD Beverages Priority Matrices

Sponsor: Paul Reporting

Project Manager: Jamia Russell



FPD requests and requirements for the project deliverables display priority matrices reflective of the above and below. Documents such as final design dashboard, model proposal, data pre-processing/ERP status documents keep the EOC and management team well-informed. Below, reflective of the project requirements FDP would like the project completed as soon as possible to improve customer feedback. Due to this performance is the man priority. There is a bit of flexibility for cost as it pertains to third party contracting and consulting with the necessary documentation.

	Time	Cost	Performance
